

cladseal

Decorative Wall Panel Sealing Kit

Durable • Flexible • Hygienic • Attractive

Cladseal

BS 5385

Cladseal

Meets BS 5385
Requirements for
Resistance to Fungus

Why offer the beauty of decorative wall cladding and spoil it with an unhygienic eyesore?

THE BENEFITS

Flexibility

A bond-breaker releases the silicone off the inside walls of the trim allowing it to stretch for movement between the ledge & wall

Durability

The sealant is protected inside a durable trim from exposure to the modern hostile shower environment

Hygiene

The sealant is concealed and does not attract bio body wash & debris

Aesthetics

No exposed sealant, slime or mildew, just an unobtrusive seal that looks great!

HOW CLADSEAL WORKS

Each Cladseal strip has a green tape (the seal liner) applied to the inside face of the strip. Sealux-N silicone cannot bond to this tape after it cures. When joint movement occurs between the ledge and wall, the Sealux-N silicone simply releases off the green tape (under tension) and stretches to accommodate joint movement. All very simple!

Everything Included:

- 2 Strips (1.85mtr)
- 2 Sealants
- 1 Mitre Box
- 2 End Caps
- 1 Spatula
- 3 Wipes

Easy to fit

With easy to read illustrated instructions
